Cuttles &
Our Consorting

Who are Cuttles

Cuttles, or cittles, are sexually active plural
littles in adult bodies. All littles are children
until her body comes of age, when some may
transition to cuttles and begin having sex the
same as anyone else.

'Grownups' is what cuttles refer to non-littles
in adult bodies as.
This booklet does likewise.

'Kid' may refer to either a cuttle or a child.
Child(ren) is never used for a cuttle,
only for those not yet of age.

When asked, a little will give her internally
felt age. If you are unsure if she is of age, ask
specifically for her body's age.

This booklet is primarily focused on cuttles
in biological bodies. For specific details on
robotic cuttles, see our sister booklet

Cuttle trinkets

(Cuttle's internal ages given)

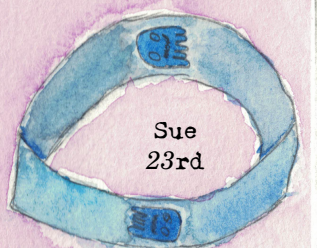

Cuttles often have a pendant,
ring, patch, etc with a cuttlefish
design on it as a cultural
artifact. Some are relatively
realistic, others more abstract.

Animal cuttles may have their features
incorporated, like the cat ears on Mittens'
patch.

They serve a practical purpose as well as a
communal one, making it clear she is a
sexually active little. It might not be
immediately visible, such as a pendant under
a jacket. If she is interested in sex, she will
present it to you. Some cuttles do not talk and
she may use it to express consent for sex
generally, with specifics to be worked out
together.

Jays & Considerations

Oral and grinding: Both giving and
receiving these is beloved by many a cuttle.
An offered thigh or welcoming mouth will
endear you to a great many of them –
and rubbing against her back will
bring a smile to you both

A joy alongside pleasure: Playing
with her is more about sharing maternal
affection, her joy & giggles, and
tenderness than sheer pleasure alone.
Sometimes it is the simplest things that she
wants, like being held while she
masturbates. Many cuttles want comfort,
cosiness, and affection more so than
climax. She won't complain if she
cums though <3

Receptive preference: Many
cuttles prefer being the receptive
partner for penetrative sex. She
often loves to use her penis or
dildos on you, in any way you may
invite her to as well

when very excited too

Share the fun: Lots of cuttles
love being shared, especially by
grownups. Ask nicely and she
might give you a turn

Cuttle led: She may want sexual play, she
might wish to engage in sex acts.
She will let you know if she wants
something. Go at her pace

Sexual competency: Don't expect her
to be particularly skilled at sex. Some
are; others' every handjob will be as
lacklustre as your first. Learn her talents
as you would any lover's

Be gentle: Although her body is adult, she
may only have the oral, anal, or vaginal
capacity of her internal age or size.
Partial insertion may be necessary

Messy cum: She might not
realise or remember to tell you
when she is about to orgasm.
You might find yourself with a cum
suddenly full mouth or a cum
spattered thigh. Particularly
young ones may pee a little
when very excited too

A cuttle's soft kiss
Her giggle you can't miss
A bouncing bundle of joy
And just a little coy
Her age is rather slight
Though she's stood sixty seasons in the light
As she lays beneath the covers
She takes her mother's lovers
One flesh shared between
Their differences felt yet unseen
It will be a treasured day
When with her you gently lay
